## **DETAILED ACTION**

### ***Specification***

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

### ***Drawings***

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "32" has been used to designate both feed line and discs, figure 15. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required

Art Unit: 2821

in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

3. Claim 1 is objected to because of the following informalities: In claim 1, line 5, "substract" should be changed to --substrate--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

4. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 7, the verb "can" renders the claim indefinite because it is unclear whether the limitations following the verb are part of the claimed invention.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2821

6. Claims 1, 5, 6, 10, 11, 14, 15, 20, 22, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Itoh et al (US Patent 6,518,930).

Itoh et al disclose, in figures 1-3, a slot antenna device comprising a slot 104 formed on a face of a substrate 102, and periodic metal pattern 116 formed on a second surface of the substrate, and a feed line 106. Regarding claim 5, the patent to Itoh et al teaches that the metallic pattern periodically etched on the surface of a grounded dielectric slab, see column 3, lines 29-34.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 4, 7, 12, 13, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Itoh et al.

The patent to Itoh et al, described above, differs from the claimed invention because it does not disclose the different shape of the periodic pattern, the different spacing between each pattern, and the different between the band gap frequency and the slot. However, the shape and the spacing between each pattern is considered an obvious matter of design choice depending upon the desired frequency of the antenna device. Regarding claim 13, the annular slot antenna is well known in the art and therefore it represents an obvious expedient.

Art Unit: 2821

9. Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Itoh et al in view of Schnetzer (US Patent 5,519,408).

The patent to Itoh et al, described above, disclose all aspects of the claimed invention except it does not teach a Vivaldi slot. Schnetzer teaches, in Figure 1, a Vivaldi slot antenna. Since one of ordinary skill in the art would have recognized the benefits of providing a broadband slot antenna, it would have been obvious to provide the slot antenna of Itoh et al with a Vivaldi slot as taught by Schnetzer.

The patents to Glade et al, Bitter, Jr., and McKinzie, III et al are cited as of interest showing the antenna similar to that disclosed.
